

***Identifying Satan’s Role in Transhumanism,
AI, and the Internet:
The Mechanism ¹ of Daniel 7:23***

A White Paper – Jay Jusino – Equipping Teachers InC, 12/10/25

ABSTRACT

Of God’s creation, man alone is made in God’s image. The first attributes of God mentioned in the Bible (Gen. 1:1) are that God [Heb. *Elohim*] exists in plurality (unity) and that He is a/the creator. Man therefore seeks to live in social unity and exhibits tremendous creativity. From Gen. 11:6, this creativity, combined with human unity, is expressed by God Himself as infinite creative potential: “nothing they purpose to do will be impossible for them.” Notably, this potential is bent toward rebellion against God (Gen. 11, Ps. 2:1-2). Angelic beings (fallen or not), while possessing many common attributes of man, do not exhibit the creative potential of mankind. Yet, fallen angels can, and actually do, use mankind in order to achieve their creative goals (Gen. 6:1-4). Satan’s ultimate goal is to become, or to be like, God (Gen. 3:5, Isa. 14:12-14). In order to accomplish this goal, he must be, or become, both a “creator” (like God) and he must also possess God-like capabilities, namely, being omnipotent, omnipresent, and omniscient. Since Satan is not God, is not creative, and does not exist every where at all times possessing all power, he must employ a plausible mechanism by which to accomplish his stated agenda of being “like the most High” (Isa. 14:14). This mechanism has become clear as the passage of time has progressed toward the climax of earth history, just as the prophet Daniel predicted. Daniel was told to “seal up the book until (Heb. ‘*ad*) the end of time” (or “time of the end”) at which time “knowledge will increase” and he indicated that these things would become at that time discernible by stating in context that “those who have insight will understand” (Dan. 12:4; 10). The mechanism broadly defined is that because man is made in God’s image and Satan is not, that Satan needs to employ (use) mankind to literally create the means by which Satan can rule as God (2 Thes. 2:4; 9; Rev. 13:4). This is accomplished through the discovery of, and eventual mastery of, the code of life, namely, the DNA molecule and also through the development of the internet (world-wide-web), the *Internet of Things* (IoT), the *Internet of Bodies* (IoB), Artificial Intelligence, and therefore the final total surveillance state. This is done by ever increasing scientific discovery and technological advancement. This technological capability makes the beast of Daniel 7:23 “different from all the other kingdoms” allowing the final beast to “devour the whole earth and tread it down and crush it.” While the culmination of this will become totally functional at the end of Rev. 13 through the mark of the beast, the system, including both the technological capabilities and the social narrative allowing this to function at that time, are in the full swing of construction at this current time in history. The Christian response is to evangelize, be sober, alert, to expose, to resist and stand firm against the schemes of the devil while avoiding fatalistic complacency.

1 For the importance of the mechanism, see explanation @ footnote # 13, p. 6.

Introduction

Daniel 7:23 and Revelation 13:17-18 predict a world (global) government at the culmination of the ages.

“Thus he [the angel] said: ‘The fourth beast will be a fourth kingdom on the earth, which will be different from all the other kingdoms and **will devour the whole earth and tread it down and crush it.**”

Dan. 7:23

“And **he causes all**, the small and the great, and the rich and the poor, and the free men and the slaves, to be given a mark on their right hand or on their forehead, and he provides that **no one will be able to buy or to sell**, except the one who has the mark, either the name of the beast or the number of his name.”²

Revelation 13:17-18

Applying logic and a grammatical historical hermeneutic to Daniel 12:4 and 12:10 ...

“But as for you Daniel, seal up the book **until the end of time** [some translations, “until the time of the end”]; many will go back and forth and knowledge will increase.”

Daniel 12:4

“... but those who have insight will understand ...”

Daniel 12:10

... leads to the conclusion that as the time of the end draws nearer and nearer, the prophetic Scriptures will become increasingly clear in a proportional manner. This idea is foundational to the development of the following thesis.

Thesis

The nature of man, being made in God’s image, and the nature of Satan (*not* made in God’s image), being desirous to usurp God’s position as Creator and thus Ruler (with the authority) of the universe, explains the modern/current rush to connect all things, both living and inanimate, together under AI algorithmic control, pushing rapidly toward the final form of earthly human government and thus the fulfillment of biblical prophecy.

² From Blue Letter Bible re: the name of the beast: “The name is used for **everything which the name covers**, everything the thought or feeling of which is aroused in the mind by mentioning, hearing, remembering, the name.” <https://www.blueletterbible.org/lexicon/g3686/nasb95/mgnt/0-1/> - Accessed 12/8/25 This implies a global narrative that associates in unity around a single name. That narrative will include everything meaning, all behaviors and choices arising from thoughts must align with the name of the beast. This is global unity at its peak.

Man – Made in God’s Image

The distinctive feature of **man alone** is that he is “made in God’s image” (Gen. 1:27). Angels and animals are not made in God’s image.

Animals	God / Man ³	Angels
somewhat	creative	No
somewhat	self – aware / thoughts	Yes
somewhat	feelings	Yes
somewhat	makes choices	Yes
Not really	knows right from wrong	Yes
No	a spiritual being	Yes

While it is true that God is, to the human mind, both “unsearchable” and “unfathomable” (Rom. 11:33), the Bible clearly reveals attributes of God that give us somewhat of a working understanding of who God is. In developing this working definition of God, in Genesis 1:1 we see the first two attributes that help us grasp just who He is. ⁴

“In the beginning God created the heavens and the earth.”

The first attribute is that “God” [Heb. *Elohim*] is plural. The second attribute, is that God is the Creator (implied from “God created”). Now,

“God created man in His own image, in the image of God He created him; male and female He created them.” (Gen. 1:27).

This paper will focus on these first two attributes in Gen. 1:1, namely, that God is foremost *the* (singular) Creator existing in plurality (God is one – Deut. 6:4), that is, in perfect unity. If man then is made in His image, then he is also creative by design and exists best, by design, in (or for) perfect unity. Both ideas will be developed more below, starting with the creative attribute first. But furthermore, and not necessarily unique to mankind (as angels likely share this attribute with man), mankind is super-smart – and that from God’s own Word! Gen. 11:6 states,

“The LORD said, “Behold, they are one people, and they all have the same language. And this [building a city and tower who’s top was to be in the heavens] is what they began to do, and now **nothing which they purpose to do will be impossible for them.**”

The Lord’s statement at the end of the verse suggests that man possesses not just a rudimentary creative capacity,⁵ but on the contrary, an **infinite creative potential**. “Nothing they purpose to do will be impossible for them” is a strong statement from the Creator Himself. Now because mankind has fallen (Gen. 3, Jer. 17:9, Rom. 3:10, et. al.), if one combines man’s creativity with his capacity for

³ The center list originating from: *Who Am I and What Am I Doing Here?* Apologia Press., 2010, p. 35

⁴ While mankind will never grasp God fully, and while the Bible does not tell us everything we may want to know about God, the Scripture has given us enough both to expect accountability and also to be able to know Him in a saving manner.

⁵ Like animals possess – i.e., a bird creates a nest each year and also reproduces. But that’s about it!

wickedness, then man has an infinite creative potential for evil, deviation, wickedness, corruption, etc. This fact explains why, in Gen. 6:3, the Lord reduced the human lifespan to 120 yrs.⁶

“Then the LORD said, “My Spirit shall not strive with man forever, because he also is flesh; nevertheless his days shall be one hundred and twenty years.”

The wickedness developing out of man’s infinite creative potential at Babel moved God to intervene in a miraculous manner to prevent mankind from gaining his unified purpose (making a name for themselves as “one people” in defiance of God’s command to fill the earth – Gen. 11:4). In this account is clearly seen the hand of Satan using (inducing, leading, etc.) man as an agent to advance his own rebellion against God.⁷ Psalm 2:1-2 reveals the pattern first seen at Babel well,

“Why are the **nations** in an uproar and the **peoples** devising a vain thing? The **kings** of the earth take their stand and the rulers take **counsel together** against the LORD and against His Anointed...”

Rebellion in its full form is a collective unification effort. Unification in Christ is good. Any and all unification outside of Christ is, or will end in, rebellion against God.⁸

Satan – Not Made in God’s Image

Satan, being angelic, and not human, is therefore not creative by nature.⁹ If Satan wants to be “like God,” then he must gain mastery over the business of creating. Furthermore, since Satan is not a creator by nature, the only things he can use are things already created. Satan thus both needs and uses man (who is part of the creation / already created), who has infinite creative potential, to aid him (in rebellious unity) in any creativity that he might want to engage in.¹⁰

While the following point is not a logically necessary component for one to accept or embrace the point just advanced, it is nevertheless supportive and helps to bridge gaps in understanding. It will therefore be developed below but not relied upon as any sort of proof-text.

The book *Fallen: The Sons of God and the Nephilim*, by Dr. Tim Chaffey, Content Manager of Attractions for Answers in Genesis at the Creation Museum and Ark Encounter in North and Central Kentucky,¹¹ is perhaps the definitive work on the subject of the Nephilim of Gen. 6:1-4.

6 Every year it seems that Halloween “decorations” can not get any worse. But the next year, they always are worse! If an end did not come to man, this would descend infinitely into ever deeper depravity. Just imagine George Soros, Bill Gates, or Klaus Schwab living for 900 yrs!

7 Nimrod, who’s name means “rebellion,” was the founder of Babylon (Gen. 10:8-10).

8 This concept is developed more fully below.

9 The role of angels in Scripture is articulated in Heb. 1:14 summarily, as “ministering spirits sent out to render service for the sake of those who will inherit salvation.” The services they perform are many, but notably include such things as delivering important messages, signaling important events (e.g., sounding trumpets), they at times carry out God’s commands (often God’s judgments), perform military functions, and some were present at the giving of the Mosaic Law as well as were likely all angels singing for joy at the creation of the earth (Job 38:7). Notably absent is creative potential.

10 If Satan is going to be “like God,” he must act in unity (though he himself is singular). This necessitates his joining with others in a collaborative, unified manner to complete the model.

11 <https://answersingenesis.org/bios/tim-chaffey/> - Accessed 9/12/25

“Now it came about, when men began to multiply on the face of the land, and daughters were born to them, that **the sons of God** saw that the **daughters of men** were beautiful; and they took wives for themselves, whomever they chose. Then the LORD said, “My Spirit shall not strive with man forever, because he also is flesh; nevertheless his days shall be one hundred and twenty years.” The Nephilim were on the earth in those days, and also afterward, when the **sons of God came in to the daughters of men, and they bore children to them**. Those were the mighty men who were of old, men of renown.”

Dr. Chaffey writes,

“The Bible tells us that rebellious angelic beings (Heb. *Bene ha’elohim*) married women, and their offspring were the Nephilim (giants). This was a sin against the natural order [cf. Jude v. 6] and contributed to the overall depravity of man that brought about the judgment of the Flood.”

While there are several competing interpretations of this text in disagreement over just who the “sons of God” were, it is beyond the scope of this work to argue those points here. Suffice it to say, the conclusion (above) that Dr. Chaffey arrives at as a result of his 500 pg. dissertation, is in agreement with this work’s assertion. It thus provides, if correct, a clear example of how the angelic world cannot create on its own, but must use humans (sub-creators – creators under God [i.e., in God’s image]) to accomplish any such feat.

Satan – His Ultimate Goal

From Isa. 14:12-14, it is easily drawn that Satan either wants to be God, or, perhaps he thinks he is God.

“How you have fallen from heaven, O star of the morning [**Heb. *Helel*; i.e. shining one; Latin = “Lucifer”**], son of the dawn! You have been cut down to the earth, You who have weakened the nations!

“But you said in your heart, ‘**I will** ascend to heaven; **I will** raise my throne above the stars of God, And **I will** sit on the mount of assembly in the recesses of the north. ‘**I will** ascend above the heights of the clouds; **I will make myself like the Most High.**’”¹²

Satan tempted Eve with the same basic argument in Gen. 3:5, namely, “and you will be like God...”

“For God knows that in the day you eat from it your eyes will be opened, **and you will be like God**, knowing good and evil.”

In Revelation 13 it is clear that at the culmination of the ages, Satan [the Dragon/Devil (Rev. 20:2)], will be “worshipped” (“like God”) by “the whole earth...”

12 This is called, “The 5 ‘I wills,’ ” denoting the extreme pride of Satan.

“And the whole earth was amazed and followed after the beast [a beast is a king / kingdom as per Dan. 7:17]; **they worshiped the dragon** because he gave his authority to the beast” [the beast being, namely, the “man of lawlessness” or “son of destruction” who will “take his seat in the temple of God, **displaying himself as being God...**” --- 2 Thes. 2:3-4] (Rev. 13:3-4).

Satan – The Mechanisms ¹³ [methodia – Eph. 6:11] to Obtain His Ultimate Goal

Transhumanism, Artificial Intelligence, & Unification

As just noted above, the appeal to “be like God” exists for humans as well as for Satan because while mankind and angel-kind do not share creative capacity, they do share pride as a fundamental weakness. This is instrumental for Satan, as he can then use man’s pride to his advantage. In order for Satan to exert authority over living things, he must be their “creator.” Even small children naturally grasp (without being necessarily taught) that creators have authority over their creations. A car or plane made of *Legos* becomes the property of its builder (creator), the child. Even a parent would **not** (though they may own the *Legos*) generally disassemble that car or plane made by their child without their child’s permission. This is because the creator/authority principle that is built in to mankind as part of the natural order of things so a parent disassembling their child’s plane would make this a moral offense to the child. Therefore, since the code of life is DNA, Satan must somehow master this most important molecule (which is matter already created by God) in order to gain this authority. Modification of DNA within a species is considered a patentable event. Creators of patents have authority over, and the rights to profits made from, those patents.

Restating the two relevant concepts from above then, for Satan to carry out his aim of becoming God, he needs help from man (who has infinite creative potential) and also must attain mastery over DNA manipulation. In order to join Satan in the quest to “be like God” man needs increasingly sophisticated technology to pull off the feat (remember, “**nothing which they purpose to do will be impossible for them**” – Gen. 6:11).

¹³ Mechanisms [or methods] matter! IBM’s Hollerith punch card technology, a precursor to the first computers and, interestingly, early forms of Agentive AI, was the key to Nazi human extermination efficiency during the Holocaust. Edwin Black’s watershed book, *IBM and the Holocaust: The Strategic Alliance between Nazi Germany and America’s Most Powerful Corporation*, published in 2001, powerfully demonstrated how their technology made mass extermination not only doable, but efficient, orderly, and reproducible. In the highly referenced work (never denied in any way by IBM), the early history of both computers and AI is laid out. The book is NOT about AI or computers, but it was the IBM punch card technology that was their direct forerunner. It was this technology that allowed the Nazi’s so much “success” in their efforts. And it is this same company (IBM), that pioneered the first computers, the first mass produced computer (the IBM 650), the first language / speech recognition (“Shoebos,” 1962), pioneered “machine learning,” algorithms, and image processing. No longer does it take any real work at imagination in order to conceive just how the mark of the beast (Rev. 13:15-18) will be not only implemented, but how it will be so powerful. So much so that all who don’t receive it (somehow it will “know” who doesn’t) will be excluded from the economy and killed (v. 15). <https://www.ibm.com/new/product-blog/from-checkers-to-chess-a-brief-history-of-ibm-ai> – Accessed 2/16/26. <https://www.ibm.com/history/650> – Accessed 2/16/26. Interestingly, Thomas J. Watson, IBM’s CEO during WWII, who was instrumental in mechanizing the deaths of 12 million people by supplying and servicing the punch-card machines at the death camps, was “immortalized” by IBM in the naming of their lead AI model ... “Watson” ... the first AI model to out compete real humans in cognitive matches as showcased in the 2011 Jeopardy tournament. <https://www.ibm.com/history/watson-jeopardy> – Accessed 2/17/26

It just so happens that such a discipline exists in the world today who's goal is to become ["be like"] God. Actually, there are two: **Transhumanism** and **Artificial Intelligence**, or **AI**.

We've established then that Satan must employ humans to develop mastery over DNA (the humanitarianism part – see below) regarding the “creator” attribute of God seen in Gen. 1:1.¹⁴ And since Satan is not omniscient, omnipresent, nor omnipotent,¹⁵ he must again use man's infinite creative potential (for evil) to build and develop the technology infrastructure that culminates in some application of that technology that will enable him to gain this level of ability and power. Something like ... Artificial Intelligence. Hence, we see the captivation the world has with DNA, AI, and human unity.

Transhumanism

Transhumanism is “the theory that science and technology can help human beings develop beyond what is physically and mentally possible at the present time ... where man supposedly **ascends to godhood and life extension** ... Transhumanism asserts that with all the new technologies available, mankind will be able solve every challenge it faces.”¹⁶ Transhumanism has also been described as ... “technologically mediated evolution”¹⁷ ... with a vision to ... “... **obtain eternal life for the human body, or at least the human brain**”... [with] “self optimization, colonization of space, **and immortality**.”¹⁸

An extremely important link to both the past and the future regarding transhumanism is the fact that the word itself was coined by Julian Huxley, grandson of Thomas H. Huxley (“Darwin’s Bulldog”), to replace the term *eugenics* because Hitler had given it a bad name. Huxley said,

“The human species can, if it wished, transcend itself – not just sporadically ... but in its entirety, as humanity. **We need a name for this new belief. Perhaps transhumanism will serve.** Man remaining man, but transcending himself, by realizing new possibilities of and for his human nature.”¹⁹

For the transhumanist vision of eternal life to be realized, DNA must be understood and able to be readily manipulated and improved upon. From even before the discovery of DNA's shape of a double helix in the 1950's by Watson and Crick, through the completion of the human genome project in 2003 and beyond, steady advancements in many different fields of technology have accelerated²⁰ the transhumanist goal. CRISPR technology has been key for the modern manipulation of DNA.

14 Again, the unity aspect of God is accomplished by joining forces with man in rebellion.

15 Attributes of God developed in other places in the Scripture (e.g., Ex. 3:14, *et. al.*).

16 <https://dictionary.cambridge.org/us/dictionary/english/transhumanism> – Accessed 12/7/25

17 That is, evolution that has been taken under the custody of man himself, as the self appointed custodian of it. This is called Human Directed Evolution and is seen clearly at the conclusion of Humanist Manifesto I: “So stand the theses of religious humanism. Though we consider the religious forms and ideas of our fathers no longer adequate, the quest for the good life is still the central task for mankind. **Man is at last becoming aware that he alone is responsible for the realization of the world of his dreams, that he has within himself the power for its achievement. He must set intelligence and will to the task.**” <https://americanhumanist.org/what-is-humanism/manifesto1/> - Accessed 12/8/25

18 Artificial Intelligence, Transhumanism, and the Devolution of Democracy, Richard. R. Schmidt, D. Min., Ph. D., pp. 98-101.

19 <https://www.conservapedia.com/Transhumanism>. - Accessed 12/7//25

20 <https://www.genome.gov/human-genome-project> – Accessed 10/31/25

“Clustered Regularly Interspaced Short Palindromic Repeats is a technology that research scientists use to selectively modify the DNA of living organisms. CRISPR was adapted for use in the laboratory from naturally occurring genome editing systems found in bacteria.”²¹

This ability to selectively modify DNA in living organisms is powerful and has birthed a wide variety of applications in “agriculture [e.g., GMO foods²²], medicine, environmental sciences, fisheries, nanotechnology, bioinformatics, and biotechnology.”²³ mRNA technology also, despite internet searches to the contrary, modifies DNA²⁴ and opens wide the possibilities for manipulation of living organisms at the individual and species level.

Artificial Intelligence²⁵

Consistent with the above passion transhumanists have to manipulate DNA to create life and remembering that modification of existing life allows patenting [authority] over the “new creation,” consider the following quote from transhumanist Yuval Noah Harari. He is a homosexual professor at Hebrew University in Israel and a key academic (writer and lecturer) championing the cause of the World Economic Forum (WEF). Below he addresses going beyond DNA manipulation and thus creating inorganic “life,” namely, Artificial Intelligence.²⁶ In the following quote, the emphasis is added (mine).

“In the Bible, God is the Creator. His chief power is to create. He creates animals and plants and humans according to His wishes. Now **we** are gaining the this power to create life, **just like God**. And in a way, we even go beyond the biblical God. Because even if you believe the Bible, the only thing God managed to create are organic beings, all these trees and giraffes and humans, they are just organic. But we are now trying to create inorganic entities, inorganic life forms ... cyborgs, Artificial Intelligence, and so forth. If we succeed, and there’s a very good chance we will, then very soon **we will be beyond the God of the Bible**.”²⁷

It appears that the dream of being “like God” seems to have been replaced by modern transhumanists with the conviction that they will go, as Harari said, “beyond” God’s abilities. Dr. Richard R. Schmidt, D. Min., Ph. D., in his book, *Artificial Intelligence, Transhumanism, & the De-Evolution of Democracy*, accurately lists and then expounds upon the “10 levels of AI.” The 10th and final level is where AI becomes God – like²⁸ (i.e., “like God).”²⁹

As already introduced above, besides not being creative, Satan is not omniscient, omnipresent, nor omnipotent. In order to be in the class of beings that are “like God,” such attributes are, by definition, necessary. Fully developed AI (and it’s supporting technology), in theory,³⁰ provides these attributes namely through, and by, connecting all things and beings together into a global, and very controllable, grid.³¹ The grid is animated, so-to-speak, by connecting all things and people (and animals for that matter) to “the cloud” (internet) and by creating a system which allows all connected entities to be able to interact with each other (working together) in a smooth and seamless fashion. This idea is summed up by the word “interoperability.”³²

By now most people have heard of the internet of things (IoT) and the internet of bodies (IoB). These two phenomena accomplish the needed connectivity and resultant interoperability to allow Satan, through the beast, the ability to “be,” or rather, practically (functionally) be, everywhere all the time which gives the power to act in such a way as to affect all connected entities instantly.³³ The IoT connects all functionally relevant objects to the World Wide Web.³⁴ Things like computers, phones, lights, automobiles, appliances, utility meters, monitors, etc. Likewise, the IoB connects all functionally relevant living things to the World Wide Web. Basically, anything or anyone who has an IP address becomes part of the World Wide Web. Humans can get an IP address through various existing and proposed methods including via injected nanoparticles, quantum dot “patches,” or “tattoos,” inserted bio-chips (to name some more sophisticated applications) or by simply wearing a device (a “wearable”), clothing, or the most common manner ... the average cell phone (average does not connote low sophistication).

“An Internet Protocol (IP) address is the unique identifying number assigned to every device connected to the internet.”³⁵

“If a single chip is embedded within the human body, then in theory every human would become a hub or a node, addressable and traceable within the larger IoT ecosystem and every owned device assigned to that Human IP address.”³⁶

30 This author in no way believes that Satan (nor any one or thing) could become God and acquire these attributes.

Nevertheless, Satan, being self deceived in the extreme, must seek these attributes. As noted later in the text, from the human perspective, he will advance far in his quest before he is fully (in all practical and temporal manners) defeated.

31 What Three Words, referenced again below, is just such a grid. Visit it here to see for yourself how this technology works. <https://what3words.com/whips.detect.mole>

32 Think of things like the Amazon Mesh Network, Linked In, all social media applications, Ring doorbells, all Smart phones and smart devices, all cameras, video or still, all audio both sending and receiving, etc.

33 The speed at which this can occur is connected to the generation of service SMART phones work on. 6G speeds (coming by about 2030) will approach 1 terabit per second – 1000 x faster than 5G. Essentially, instantly!

<https://search.brave.com/search?q=how+fast+is+6G>

<https://search.brave.com/search?q=how+fast+is+6G> - Accessed 12/10/25

34 “The World Wide Web was invented by British scientist Tim Berners-Lee in 1989 while working at CERN” - <https://home.cern/science/computing/birth-web> – Accessed 2/15/26

35 <https://www.fortinet.com/resources/cyberglossary/what-is-ip-address> – Accessed 12/8/25

36 <https://www.forbes.com/sites/theopriestley/2015/09/22/why-every-human-will-have-an-ip-address-by-2025/> - Accessed 12/8/25

Thus, IoB becomes a mere subset of IoT. But the larger point is the ubiquitous (worldwide) control that this interoperability allows. And for its part, the AI algorithms will work in and through this system to regulate, manage, and control each and every “node” (end point – including humans) of the system.³⁷

Some say that the projected AI capabilities are over-hyped.³⁸ To that idea, consider that the former head of Google, Eric Schmidt, has predicted that AI will be “smarter” (i.e., more capable) than all humans combined by about 2030.³⁹ Elon Musk likewise envisions connectivity via his Neuralink to allow for a “single collective will for humanity.”⁴⁰ An important perspective to consider when analyzing the over-hyped assertion is that while the predictions of these men may be delayed beyond their expected advent, or, may never come about at all, nevertheless, these things are in no uncertain terms what these people very clearly intend and hope to rapidly bring about. In other words, they are taking bold, consistent, and urgent steps to bring these capabilities to pass. This is important for our wisdom’s sake.

Unification – DNA, AI, and the Grid

On day 2 of the second Trump administration, President Donald Trump unveiled what is called the Stargate AI Infrastructure Project which was heralded by Oracle CEO billionaire Larry Ellison as a way to personalize cancer mRNA vaccines within 48 hours of detection.

“One of the most exciting things we're working on ... is our cancer vaccine. You can do early cancer detection with a blood test, and using AI to look at the blood test, you can find the cancers that are actually seriously threatening the person. You can make that vaccine, that mRNA vaccine, you can make that robotically, again using AI, in about 48 hours.”

This amounts to an integration of the DNA (biological) with the artificial (AI) into a system of ever increasing monitoring and management (control/regulation).

The Register (see associated footnote) explains Ellison’s model,

“If governments want in, they’ll need to gather all their data – spatial information, economic data, electronic healthcare records including genomic data, and info about infrastructure. Whatever they’ve got, basically. And put it all in one place to be analyzed by algorithms.”⁴¹

Ellison has said similar things on multiple occasions but one notable occasion was before the World Government Summit (2025) while speaking with former UK Prime Minister Tony Blair,

37 <https://www.technocracy.news/ais-prime-directive-stunning-realization-from-chatgpt-itself/> - Accessed 12/8/25

38 To this writer, the “over-hyped” idea regarding any threat AI presents a threat in itself. Many in the Christian community are quick to dismiss any concern that advancing technology brings. If one is concerned, they are relegated to the “Amish camp” of thinking and practice which justifies them being dismissed out of hand. However not only should the recent Covid 19 *plandemic* give pause to the one who dismisses caution in regard to ever advancing technology, so should the Scriptures this paper started with (Dan. 7:23; Rev. 13:16-18) give pause to such dismissal.

41 Ibid.

“The first thing a country has to do is to **unify** all their data so in can be consumed and used by the AI model ... I have to tell the AI model as much about my country as I can ... you have to take all of your health care data, your diagnostic data, your electronic health records, **your genomic data** ... we have to take all of this data we have in our country and move it into a single, if you will, **unified** data platform.”⁴²

It is important that a note on unification be made as germane to the interoperability (fluid connectedness) of all tech and data and to the nature of man, Satan, and biblical principal. AI applied to everything and everyone via the internet provides the holy grail so-to-speak of Satanic rebellion. This is because it provides, as mentioned above, a scientific real-world capability to create (remember Gen. 6:11 – nothing will be impossible for them), and to literally connect, all things, living and non-living, into an **observable and controllable grid**.⁴³ But for this grid to function properly (for Satan’s purposes) it requires a mindset and willingness of global unity, a concept that goes against all natural desires for freedom, liberty, and the ability for people to follow the biblical directive “to make it your ambition to lead a quiet life and attend to your own business and work with your hands ... so that you will behave properly toward outsiders and not be in any need” (1 Thes. 4:11-12). This natural desire to live free (more unconnected) exists in tension with the human desire for unity, that is, being not isolated and autonomous but part of a larger picture or purpose.

Why humans gravitate toward “unity” (Gen. 11:6, Ps. 2:1-2, Rev. 19:19)

God is one God but existing in three persons [the God the Father, God the Son, God the Holy Spirit]. Therefore, He exists in perfect unity [Gen. 1:1, 1:26; Deut. 6:4] with Himself. As image bearers of God, man then too is made for unity. Certainly one aspect of that is the unity of body, soul, and spirit existing the same space simultaneously. But additionally, man seeks unity with those outside himself, i.e., with others. Man naturally seeks this same unity aspect of being made in God’s image but the fall has corrupted its expression and fulfillment. Knowing this, Satan presses the design feature by offering fulfillment of this longing for unity but offering rather a counterfeit of it, knowing he’ll get many takers. Man also, knowing he is but dust (Eccl. 3:20), finds fulfillment in being part of something bigger than himself.

Satan uses all these proclivities of man to his full advantage. This is why the modern global narrative⁴⁴ appeals directly to humans (Christians included) through words like, “together,” “we,” “our,” “us,” “collective,” “collaborate,” “community,” “common,” “united,” “partnership” etc...⁴⁵

42 <https://thewinepress.substack.com/p/oracles-larry-ellison-wants-to-unify> – Accessed 2/17/26

43 And easy example of an observable grid that would be controllable with the addition of SMART technology is the What Three Words global mapping system that has covered the globe with a grid of going down to 3 m². Each 3 m² box possesses a unique three word name. Zoom in to any house on the map and one will find that individual houses are divided into many specific identifiable named locations. Using the digital twin capabilities via SMART tech (devices and internal IP addresses), a remarkable degree of control can already be readily applied. <https://what3words.com/whips.detect.mole> – Accessed 12/8/25

44 Which is the People Planet narrative (also called, Sustainability – as in the United Nations 17 Sustainability Goals). This concept is explained via the video of the lecture, “Understanding The Great Reset: A Biblical Analysis found here: Part 1 [https://rumble.com/v61jt78-the-great-reset-part-1.html?e9s=src_v1_ucp_a] and Part 2 [https://rumble.com/v61k07q-the-great-reset-part-2.html?e9s=src_v1_ucp_a]

45 Any student of 19th century history will recognize these terms as the buzzwords of communism. Here, global (final phase) communism.

The gravity of this issue is realized when one notices the consistent theme from ...

Genesis 11 – Mankind’s **unification in rebellion against God** under Nimrod – who’s name means, “rebellion.”⁴⁶

... through ...

Ps. 2 – vv. 1-2 - “Why are **the nations** in an uproar and **the peoples** devising a vain thing? The **kings of the earth** take their stand and the **rulers** take **counsel together** against the LORD and against His Anointed.”

... and finally to ...

Rev. 19:19 – “And I saw **the beast and the kings of the earth and their armies assembled** [ostensibly together] to make war against Him who sat on the horse and against His army.”

... namely, that the unified rebellion against God motif occurs, literally, from the beginning of the Bible to the end.⁴⁷ Unification of man, if it is not in Christ, is, or will end in, rebellion against God. Interestingly, Christians are often, it seems, even more susceptible to falling for the Satanic false (global) unity narrative than their non-Christian neighbors. This is because unity, in its designed form, is first and foremost a biblical concept, as noted above, originating in God’s very nature. Furthermore, in John 17, Jesus, in His high priestly prayer, focuses on unity between the disciples, Jesus, and the Father⁴⁸ not to mention the many other places in the Bible in which the oneness of believers is taught.⁴⁹

“The glory which You have given Me I have given to them, **that they may be one**, just as **We are one**; I in them and You in Me, that they may be perfected in unity, so that the world may know that You sent Me, and loved them, even as You have loved Me.” (Jn. 17:22-23).

An additional important reason that Christians can fall for the global unity narrative is due to a skewed view of eschatology and a categorical rejection of the future tense of many parts of both Daniel and Revelation (as well as other prophetic portions of Scripture). When a Christian is taught by their pastor or other teachers that Daniel’s and John’s prophecies (Revelation) are allegorical (not literal), and that all the prophecies made to Israel are meant for, or fulfilled in, the Church, then it becomes more difficult to pick out the global unity in rebellion against God narrative as being a bad thing.⁵⁰ Furthermore, these concepts are tied of necessity to a postmillennial view of the end times. Namely, that the earth will be fully Christianized before Jesus returns. This view is literally opposite and stands in full contradiction to the literal view of Dan. 7:23 and the sobering words of Jesus in Matt. 24:6-12.

46 <https://www.blueletterbible.org/lexicon/h5248/nasb95/wlc/0-1/> - Accessed 12/8/25

47 It’s like saying, “From Dan to Beersheba,” meaning, “From one end of Israel to the other” (e.g., 1 Sam. 3:20).

48 By the power of the Holy Spirit, the third member of the trinitarian God.

49 One notable Scripture believers misinterpret is in Acts 2:44 which states that, “And all those who had believed were **together and had all things in common.**” This is unity in the belief in Christ (“all who had believed”) and in the purpose for which they saw immediate need of their bretheren. They acted out of love for one another and out of personal generosity, not due to state mandates (as in communism). Some Christian voices have erroneously advanced communistic ideology (and thus practice) in reference to this verse, having embraced a skewed view of “unity.”

50 Primarily because “unity” is not associated with evil by this theological model.

“Thus he said: ‘The fourth beast will be a fourth kingdom on the earth, which will be different from all the other kingdoms and will devour the whole earth and tread it down and crush it.’
Dan. 7:23

“You will be hearing of wars and rumors of wars. See that you are not frightened, for those things must take place, but that is not yet the end. For nation will rise against nation, and kingdom against kingdom, and in various places there will be famines and earthquakes.

“Then they will deliver you to tribulation, and will kill you, and you will be hated by all nations because of My name. “At that time many will fall away and will betray one another and hate one another. “Many false prophets will arise and will mislead many. “Because lawlessness is increased, most people’s love will grow cold.
Matt. 24:6-12

Things will not get better on earth before (or at) the end, but worse.

“Now the Spirit expressly says that in latter times some will depart from the faith, giving heed to deceiving spirits and doctrines of demons.”
1 Tim. 4:1

“But evil men and impostors will grow worse and worse, deceiving and being deceived.”
2 Tim. 3:13

“even to the end there will be war; desolations are determined.”
Dan. 9:26

The idea (postmillennialism⁵¹) of things getting better and better (more and more Christian) is not consistent with the many plain and clear prophetic texts (as sampled above). Amillennialism as well, the idea that we are all in the millennium already and Satan is therefore currently bound,⁵² does not give believers a clear pattern by which they will recognize the nearness of Christ’s return. It thus produces confusion in regards to the signs of the times⁵³ including those stressed and articulated in this work.

These ideas are most commonly advanced through a systematic Reformed theology that predicts that the future will not devolve into a global tyranny controlled by the Antichrist, but rather build up, better and better, to facilitate and pave the way for the glorious return of Christ. Reformed theology sees a general Christian global unity as a necessary aspect preceding Christ’s return. Much of this vein of thought among Reformed teachers is a result of their rejection of any future purpose that God has for

51 The millennium itself being defined as the thousand year reign of Christ predicted by John in Rev. 20:4, *et. al.* as well as throughout the OT prophetic books. The postmillennial view is one of the Christianization of earth prior to the 1,000 reign of Christ.

52 This is because the “1,000” years mentioned six times in Rev. 20:1-7 are, in the Amillennial view, allegorically interpreted and do not mean a literal 1,000 years. Because it is in this context (v. 2) that Satan is “bound” they therefore do not acknowledge his presence as currently active on earth or in the affairs of men.

53 A reference to Jesus words in both Matt. 6:3 [cf. Luke 12:56] (being critical of those who would not recognize the time of His first coming) and to His words in Matt. 24 when His disciples asked him, among other things, “Tell us, when will these things happen [referring the destruction of the temple in AD 70], and what will be the sign of Your coming [a second specific question], and of the end of the age [a third specific question]?”. Jesus’s answer being consistent with the prophecies of Daniel 2, 7, 9, 12, *et. al.* All these references and more demonstrate that awareness of the times is both advisable, consistent with wisdom, and very practical.

the Jewish people, that is, the physical descendants of Abraham, Isaiah, and Jacob.⁵⁴ This rejection is a result of an allegorical (non-literal) interpretation of many prophetic texts and thus muddies the water regarding the ability to recognize, again, the signs of the times.

To conclude this section on unification, the more humans are unified, the more easily Satan can exercise practical lordship (“omni”) over all of them. This follows logically.

Summary Statement

Satan uses all the aspects of man being made in God’s image to his evil advantage. He employs man’s creativity and great intelligence to gain his goal of becoming God by tempting man with that same desire. Then he unifies humanity under this false hope, the hope of immortality (being “like God”) in order to achieve that very goal himself. It is this unification itself that, unbeknownst to mankind, allows Satan to dominate them all. This occurs through the mastery of DNA and the application of AI to the entire world, connecting both inanimate things and all living things (IoT / IoB) into a single unified system of interconnectedness (interoperability). This functions as a global narrative that, when fully mature (@ the time of Rev. 13:17-18), will be required for participation in society. While this system is not yet complete, this is where the current societal momentum is carrying humanity – and at break neck speed!⁵⁵

How it Will All End

Revelation 13, 2 Thes. 2:3-10, et. al., suggests that Satan will advance far in this endeavor. Not that he will actually become God, but rather he will advance far in his earthly control in his attempt to do it. In Revelation 13, we read that the [first] beast has ...

great authority (to act for 42 months) / great power given by the dragon / power to overcome the saints / no one would even think to wage war with him / all who dwell on earth will worship him

While the second beast ...

makes everyone on earth worship the first beast / makes an image of the beast / makes the image speak (gives it breath) / kills all who do not worship the image / excludes from the economy all who refuse the mark

This is because ...

“The coming of the lawless one is according to the working of Satan, with all power, signs, and lying wonders, and with all unrighteous deception among those who perish ...”
2 Thes. 2:9-10

⁵⁴ That is, an embracing of Replacement Theology.

⁵⁵ It is said that knowledge in doubling every 12 months – soon to be every 12 hours. While different sources disagree about exact metrics and timing, the basic idea is well established. <https://www.learningguild.com/articles/marc-my-words-the-coming-knowledge-tsunami> – Accessed 2/15/26. **Yet AI is now said to be doubling every 5-6 months!** <https://www.technocracy.news/matt-shumer-something-big-is-happening-with-ai/> - Accessed 2/16/26

What is The Christian Response?

The answer to this question could take the space of an entire paper in itself. It will only be briefly addressed here as it is not the main focus of this document. According to the biblical model, **Christians should:** restrain the advance of this evil (2 Thes. 2:7), resist it (Eph. 6:13), stand firm against [this] scheme [Gk. *methodia* – Eph. 6:11) of the devil, avoid joining it but rather expose it (Eph. 5:11), and put on the full armor of God (Eph. 6:13ff) beginning with the belt of truth and the breastplate of righteousness. Nor should we fear or fret (Ps. 37), but be sober and alert (1 Thes. 5:6-8). Neither should we become fatalistically complacent!

A special note on this last point is deserved. Many respond to content such as is contained within this White Paper by saying to themselves (and very often out loud to others) something like, “Well, we can’t change the prophecies. It’s going to come.⁵⁶ There is nothing I can do about it.” And then, because of this, simply act as if all things will continue on as normal, even dismissing the topic as worthy of any interest or discussion. This is **fatalistic complacency**, a principle that is **not found in the Bible!** Those who assert this view do so not out of wisdom or as a result of biblical study, but out of simplicity, emotion, and/or ignorance.

Objections and Questions

1. What about Christians and AI, or even, “Christian” AI? Can AI be used for information processing (i.e., for good purposes)?

Answer

In 1 Chron. 12:32, we read ...

“ [The] ... the sons of Issachar [were] men who understood the times, with knowledge of what Israel should do ...”

The operative point in this is that understanding and knowledge of one’s times have a decidedly and practically functional result. Jesus implied this clearly when he criticize the Pharisees in Matt. 16:2-3...

“When it is evening, you say, ‘It will be fair weather, for the sky is red.’ “And in the morning, ‘There will be a storm today, for the sky is red and threatening.’ Do you know how to discern the appearance of the sky, **but cannot discern the signs of the times?**”

If the Pharisees and Sadducees had understood the times with knowledge, they would have **acted very differently** toward Jesus and the things that he said.

When the tower of Babel was being built, there was, no doubt, some technological invention, perhaps, the newest and latest brick oven [Gen. 11:3] and a newly discovered mortar mixture (recipe), that produced exceptional strength in the then budding (man was repopulating after the Flood) building industry. At this point, some objectors to Nimrod’s system and plan could have recognized what he

⁵⁶ One of this authors favorite sermon of the past was delivered by Dr. Erwin Lutzer, formerly of Moody Church, perhaps back in the early 2000’s. The title (from memory – not referenced) was, “**Things That Must Come.**” It was an excellent sermon but did not conclude by advancing any sort of complacency, but rather, sober alertness!

was doing, namely, acting in proud rebellion against God by unifying man against Him. They recognized that the newest technology of brick building and laying was the key to advancing the rebellion (building the tower). Would it have been morally wrong for them to avoid using that very brick-technology (purchasing from, say, the “Tower of Babel Brick and Mortar Company”) for their own personal homes and out buildings? This author would say probably not, yet this example is not a one-to-one correlation. Unfortunately, things are not so black and white today as then. Suffice it to say, that anyone who uses a normal computer or SMART device (like a phone) today is “using” AI as AI algorithms are already distributed across the modern technological platforms.

The premier Christian expert on technocracy⁵⁷ today is Patrick Wood.⁵⁸ To loosely quote him, he has said something to the effect, “The only good use for AI is to destroy AI.” Whether one agrees or not with this statement, it provides some very well informed insight into the threat AI poses to society. The example above regarding the analogy to the technology of making bricks at Babel is overly simplistic in that AI, as indicated previously, has many levels. IBM.com states it this way,

“Unlike traditional AI models, which operate within predefined constraints and require human intervention, agentic AI exhibits autonomy, goal-driven behavior and adaptability. The term “agentic” refers to these models’ agency, or, their capacity to act independently and purposefully.⁵⁹

The brick analogy above would correlate more to “traditional AI.” It is the Agentic AI that becomes significantly more problematic. While Agentic AI was born out of earlier phases of AI development, nevertheless, the earlier forms of AI could be quite helpful for data analysis functions. But time and “progress” don’t stop. AI has developed to what some would say is a frightening stage.

“There will be signs in sun and moon and stars, and on the earth **dismay** among nations, in **perplexity** at the roaring of the sea and the waves, **men fainting from fear and the expectation of the things which are coming upon the world**; for the powers of the heavens will be shaken.”
Luke 21:25-26

As explained above, transhumanism's goal is immortality and for AI, it is to arrive at “God-like AI.” It is clear then that these are satanic movements bent on deceiving the whole earth and then replacing God. Where is the line between using developed technology that is infused within functional society wisely for good or, conversely, to avoid participating in the fruitless deeds of darkness (Eph. 5:11)? How does one “resist in [**this/our**] evil day” and “stand firm against the schemes [Gk. *methodia* – methods – including the schemes that this White Paper has addressed] of the devil”? (Eph. 6:11-13) The church, unfortunately, does not seem to be asking these types of questions or seem to even have any real interest in them at all. Hopefully, the next question will give at least food for thought on this matter.

57 Technocracy is social engineering to bring about a ruling of society by a technologically scientific elite.

58 Please see Patrick Wood’s website, technocracy.news for a wealth of information on this topic as well as his article entitled, “AI’s Prime Directive: Stunning Realization From ChatGPT Itself.” May 19, 2025.

<https://www.technocracy.news/ais-prime-directive-stunning-realization-from-chatgpt-itself/> - Accessed 12/25/25

59 <https://www.ibm.com/think/topics/agentic-ai> – Accessed 12/10/25

2. What about ministry? Can Christians use AI, the internet, and/or Big Tech for sharing the gospel or for other ministry? I.e., Where does one draw the line regarding Eph. 5:11, “**Do not participate in the fruitless deeds of darkness**, but rather expose them”? What about Eph. 6 ... resist, stand firm ... ?

Answer

This is a difficult question to answer and even harder to answer succinctly!

First off, the obvious ought to be stated clearly, namely that the phrase “ignorance is bliss” is rooted in the relevant Scripture, “Because in much wisdom there is much grief, and increasing knowledge results in increasing pain” (Eccl. 1:18). The more one knows, the more difficult life becomes as knowledge brings responsibility and accountability to a higher level. Total ignorance of transhumanism and AI’s common goal results in no moral objections, but merely one’s keeping up with the times.⁶⁰ Knowledge of what is going on with both of these brings up many moral dilemmas. Many⁶¹ choose ignorance to avoid these dilemmas. Yet the Scripture is clear that though knowledge (and understanding) must be handled rightly,⁶² it is nevertheless prudent and wise to do gain knowledge and understanding. It is instrumental in aiding believers in their goal of walking in righteousness.

“The fear of the Lord is the beginning of knowledge (Prov. 1:7)

“The mind of the prudent acquires knowledge, and the ear of the wise seeks knowledge.” (Prov. 18:15)

“So the people without understanding are ruined. (Hos. 4:14)

“Give me understanding that I may observe Your law and keep it with all my heart.” (Ps. 119:34)

Let this author be very clear on another point, that a key motivating cause for this White Paper rests in the principles of Prov. 24:11-12,

“**Deliver those who are being taken away to death**, and those who are staggering to slaughter, **Oh hold them back**. If you say, “See, we did not know this,” Does He not consider it who weighs the hearts? And does He not know it who keeps your soul? And will He not render to man according to his work?”

This primarily includes bringing attention to the matter,⁶³ especially to church leadership. Isa. 56:10 states,

“His watchmen are blind, all of them know nothing. All of them are mute dogs unable to bark...”

Let this *not* be true of pastors and elders now, in our time, regarding the dangers presented by transhumanism and AI.⁶⁴ The heart of this writer is not to focus on criticizing church leadership, but to

60 Colleges and universities today offer Masters Degree classes in Artificial Intelligence.

61 Including in the church.

62 1 Cor. 8:1 – Knowledge puffs up, but love builds up. Knowledge must be applied lovingly and not arrogantly.

63 From a teachers perspective, it is a matter of sober reflection on James 3:1, “Let not many of you become teachers, my brethren, knowing that as such we will incur a stricter judgment.”

alert and encourage them toward sound and timely⁶⁵ teaching on this matter. The personal goal for this writer is simply, “so that I may by all means save some” (1 Cor. 9:22), as v. 11 above directs. And v. 12 above puts one right back into the Eccl. 1:18 slot. Let us not pretend we don’t know.

The second point follows from the above, namely, that it is quite a certain expectation that Christians will be all over the map on their responses on how to answer the question of how to personally handle AI, even if all of them read this work. That said, this author will simply aim to give some food for thought on the matter in hopes of helping each reader think through it all. The first suggestion is that each reader do so prayerfully while continuously asking God for wisdom for each matter that arises.

To actually begin the answer to the question / objection above, I will transition to writing in the first – person.

Here is what I am NOT saying, stating, nor implying.

1. I am NOT saying Christians can never use AI, Big Tech, SMART Meters, or be connected to the cloud, the World Wide Web, etc. I am not anyone’s judge (even for myself – 1 Cor. 4:3).
2. I am not saying that ministry (incl. preaching the gospel) can’t or shouldn’t use AI, the internet, or social media. The gospel **has been** and **can be** preached via using such technology. After all, what the enemy means for evil, God means for good.⁶⁶ And God’s Word will not return void but will accomplish the work He intends it to accomplish (Isa. 55:11).⁶⁷

Here is what I am saying

1. AI (IoT, IoB, the World Wide Web and indeed, social media) is a wide-net Trojan Horse built to steal, kill, and destroy (Jn. 10:10) according to Satan’s intentions and Christians, by-and-large, are ignorant of this to a fault.⁶⁸

64 The context of Isaiah 56:10 includes vv. 11-12. The reference here to v. 10 is **not** meant to imply that the average pastor today is “greedy,” after “unjust gain,” (v. 11) nor to imply that they are heavy drinkers unconcerned about their responsibilities (v. 12). Rather, it is meant to educate them to the danger that AI *et. al.* represents and to spur them on to warn their flocks like good watchman (part of the function of a shepherd) ought. The reference to v. 10 is meant **only** to apply the first principle by analogy ... namely, a watchman ought to not only be aware of present and impending danger, but also warn the flock of that danger, rather than to stay silent. Failure at this point allows the enemy to be in the camp unidentified thus exposing the sheep to harm.

65 Meaning, now.

66 “As for you, you meant evil against me, but God meant it for good in order to bring about this present result, to preserve many people alive.”

67 “So will My word be which goes forth from My mouth; It will not return to Me empty, Without accomplishing what I desire” [even on an AI app!] “And without succeeding in the matter for which I sent it.”

68 It should be clear that the transhuman/AI movement and goals represents a false gospel, namely, the gospel of religious humanism. A movement who’s political form is global communism using technocracy (Rev. 13:17-18) as its social enforcement tool. Just like John preached, “And the Word became flesh” in Jn. 1:14 and thus, in defining who Jesus is, dismantled the Gnostic Heresy, the false narrative of the day ... so too can we today, by understanding the false narrative (false gospel) being offered today in our time, be ready and equipped to provide true answers to lost souls seeking Truth in this current time.

- a. Regarding ministry, it's a numbers game (see point # 2 above). Which is more impactful? Will more souls be saved through using AI tech, *et. al.* in ministry, or will more souls be saved by warning people of, and extracting them from, the hidden and rapidly rising Satanically led beast system that uses AI tech, *et. al.*, as its key tool?

My current thinking (which, of course, could change) I will state as a question, namely ...

...is it possible that no contradiction exists⁶⁹ between using AI tech for ministry and the gospel in general (Gen. 50:20, Isa. 55:11) while simultaneously alerting users (and people in general) of its dangers (Eph. 5:11, Eccl. 1:18) and advocating a retreat from, and resistance to (Eph. 6:11-13), interoperability and AI dependency [including constant digital surveillance] (1 Cor. 7:23)⁷⁰ into better, more free,⁷¹ alternatives? It is my observation that this is a discussion that the church at large ought to be currently heavily engaged in. Unfortunately, by and large, it is not. "Ignorance is bliss" seems to be exercising the upper hand.

Let the discussion begin! Prov. 18:17, 27:17⁷²

69 Unfortunately, through many worldly deceptions and empty philosophy (Hegel comes to mind), we have all been socially groomed or conditioned to comfortably allow direct contradictions to exist in our minds simultaneously and, sadly, happily. E.g., God created [thesis]. Evolution (Nature) created [anti-thesis]. Theistic evolution is the answer [synthesis – which is false]. I do not advocate this in any way.

70 "You were bought with a price; **do not become slaves of men.**" While pastors (in general) are quick to honor those that serve in the military within their congregations on Veterans Day, Memorial Day, Independence Day, et. al., and while many of them (maybe most) are quick to support and even defend the US Constitution in their sermons, what they by-and-large fail to see is that the AI algorithm, tech, and transhumanism threat is far more likely to destroy our Constitutional freedoms in the very near future than any invasion from a foreign army. Why is it acceptable and applauded to praise defenders of the Constitution who act in the armed forces while dismissing as conspiracy theorists those who defend that same Constitution from a technocratic AI takeover? The contradiction is extreme.

71 It is not lost on this author that the goal of all of this, heading to Rev. 13:16-18, is the opposite of freedom. Not being able to buy or sell is, what I call, economic exclusion. Hence, to retreat from being in this system is to put one's self into a more and more restricted (not free) existence. Taking the Hebrews 10:34, and 11:36ff approach, I suggest that this is part of counting the cost of following Jesus. Also, our actions today will be seen / observed by others. While we may be truly saved and thus eternally secure, others watching may not be (most are not). Hence, what we communicate to them by modeling becomes important. This point is worth some sober consideration in my opinion.

72 "The first to plead his case seems right, Until another comes and examines him (Prov. 18:17), Iron sharpens iron, so one man sharpens another" (Prov. 27:17).
